Stuart

It was good to meet you at the DHI conference this week. (As I write this, I've just seen Barry's email come through about your IS2050 conference – I'd actually already looked it up and passed details onto my colleagues, I hope we will be able to attend.)

I promised to send through links to some published outputs from the ETI Tidal Resource Modelling study I worked on. As I said, most of the reports have not been released to the public but I have found the following presentations and papers that give a flavour of the project:

Presentation about the project:

Conference paper about the project:

Appendix C of this report we wrote for The Crown Estate may also be of interest (it uses material from the ETI study):
