

QUESTIONNAIRE CONCERNING PROPOSED Y MORFA LEISURE CENTRE EXTENSION

by Board of Kinnel Bay & Towyn Sports & Recreation Association: November 2009

1. Respondent status 1. Age (*tick one box*)

0-11	12-24	25-49	50-	75+
------	-------	-------	-----	-----

2. Town 3. Street.....

2. Attitude to present facilities. Staffing by more than one full-time person cannot be justified by demand because our Leisure Centre presently only has indoor facilities as follows:-

- (i) Large indoor multipurpose room (for five-a-side game, tennis court or badminton courts four cricket nets, adult youth club activities etc)
- (ii) Two squash courts – with removable middle wall so other uses possible, e.g. karate
- (iii) Changing rooms/toilets

a) Are/were you familiar with where the centre is? (*tick one box*)

Yes	No
------------	-----------

b) Compared to other sites within Conwy (which commonly have facilities for a range of activities justifying three or more staff members) do you view this situation as.....(*tick one box*)

Grossly inadequate	Barely adequate	Sufficient	More than enough

3. Justification or otherwise. In the £2.5m extension that is being planned, please indicate which of the following facilities seem generally justified, and which you/your family might well use personally (*please tick one or both boxes in each row, or none, as felt appropriate*):

FACILITY	Generally justified?	Personal/within-family use?
Well-staffed counter with notice-board etc.		
Refreshments/function room		
Viewing facilities (i) to main play area & squash courts		
Viewing facilities (ii) to outside football & cricket pitches		
Upstairs classrooms/general purpose rooms		
Upstairs fully supervised Youth Service facility		

4. Flood risk related adaptational use. Everyone knows the story in 1990 of how children had to sit on their desks when water came into the classrooms. Please indicate your view of the way we should/should not plan for future recurrences of a similar scenario:-

ALTERNATIVE VIEWS	Tick here as appropriate
Waste of time and money, as sea and river defences should guarantee for all time against any possible recurrence of events like 1990	
Future risk, though unlikely for now, should still be prepared for properly	

5. Climate change adaptation. Not only do heating & lighting costs loom large in most sports centres, but extra grant money can sometimes be obtained for buildings close to schools that can help educate the public about energy efficiency. Please indicate your attitude as to whether (say) an extra 10% on 'spend to save' building costs along these lines should be considered:

ALTERNATIVE VIEWS	Tick here as appropriate
Should not spend any more than absolutely necessary	
'Spend to save' may make economic/environmental sense	

6. Any more comments?.....

Thank you very much for filling this questionnaire and returning as appropriate (e.g. to Y Morfa Reception)
