Dear Sir/Madam:

On behalf of the Kinmel Bay & Towyn Sports & Recreation Association I would first like to express appreciation for the efficient yet stimulating way the Challenge has been put together, with all the encouragement for the sharing of knowledge and experience that there has been, and is promised, with other applicants.

The short time-frame has helped to focus minds as never before, so that – though many loose ends remain to be tied up (not least the small matter of a business plan!) – the Board feels confident that we have on offer the outline of a boldly distinctive yet realistically attainable project likely to offer benefit and inspiration well beyond our own community as well as within it and neighbouring it.

In assembling the attachments the following prefix codes have been added for easier orientation:-

EA: Eligibility Assessment

EAL: list (with some added explanatory notes in italics) of stated or implied endorsements for consideration at Eligibility Assessment stage.

A1 to A57: references first cited in the Eligibility Assessment (NB just two of these, A15 & A23, are still missing – to be forwarded asap).

MA: Main Application

B1 to B77: References first appearing in the Main Application (NB. B1, B10 and B78 are actually commentaries)

I trust that this coding is helpful but would be glad to answer any outstanding issues or questions.

Yours sincerely,

Cllr Stuart Anderson (Lead Applicant and Board Member)

PS the Kinmel Bay Medical Centre's endorsement (A13) is supposed to be on its way this morning so I will try to send on immediately.
